# Lecturer Feedback & Evaluation

Personal & Collaborative Project Management Platform

| | |
|---|---|
| PROGRAM | **DEPI** |
| DOCUMENT | **Lecturer Feedback & Evaluation** |
| VERSION | **1.0** |
| PREPARED | **14 October 2026** |
| STATUS | **Pending lecturer assessment** |
| AI | **Out of scope** |

**Important:** This document is a structured template for recording the lecturer's actual assessment. No lecturer feedback, score, or approval has been assumed or invented. Complete the evaluation fields after feedback is received.

## 1. Purpose

This document records the lecturer's assessment of TaskFlow, the feedback provided during project review, the improvements recommended, and the team's response to each recommendation. It supports traceability between the initial proposal, the approved requirements, and subsequent project changes.

## 2. Project Summary for Evaluation

TaskFlow is a project and task management platform intended for individuals, freelancers, small teams, and companies. It supports personal and shared workspaces, projects, Kanban boards, task management, Gantt-style scheduling, time tracking, collaboration, and reporting. Optional client-facing functionality includes a Client Portal and Project Live Room, deliverable review, change requests, and controlled progress sharing. Work handover notes and rule-based project-health alerts are also planned.

The proposed stack includes ASP.NET Core MVC, Entity Framework Core, ASP.NET Core Identity, SQL Server or Azure SQL, SignalR, Bootstrap 5, JavaScript, and supporting libraries for Kanban, Gantt charts, and analytics. AI and AI-based functionality are outside the project scope.

## 3. Lecturer and Review Details

| Field | Details |
|---|---|
| Lecturer / Reviewer Name | To be completed by the team |
| Review Date | To be completed |
| Review Type | Proposal review / Requirements review / Design review / Implementation review / Final evaluation |
| Project Version Reviewed | To be completed |
| Team Representatives Present | To be completed |
| Review Evidence | Meeting notes, review form, email, LMS feedback, or other approved evidence link |
| Overall Assessment | Pending lecturer assessment |
| Score / Grade, if provided | Pending lecturer assessment |

## 4. Lecturer's Assessment

Complete this section using the lecturer's actual comments and evaluation. If a criterion was not assessed, mark it as **Not assessed** rather than guessing.

| Evaluation Area | Lecturer's Feedback / Assessment | Status or Score (if provided) |
|---|---|---|
| Problem definition and project relevance | Pending lecturer feedback | Not assessed |
| Target users and stakeholder needs | Pending lecturer feedback | Not assessed |
| Project scope and feasibility | Pending lecturer feedback | Not assessed |
| Feature selection and prioritization | Pending lecturer feedback | Not assessed |
| Technical architecture and technology choices | Pending lecturer feedback | Not assessed |
| Database design and data integrity | Pending lecturer feedback | Not assessed |
| Security, authentication, and authorization | Pending lecturer feedback | Not assessed |
| UI/UX and accessibility | Pending lecturer feedback | Not assessed |
| Testing and quality assurance approach | Pending lecturer feedback | Not assessed |
| Timeline, teamwork, and resource allocation | Pending lecturer feedback | Not assessed |
| Documentation and presentation readiness | Pending lecturer feedback | Not assessed |
| Overall project assessment | Pending lecturer feedback | Not assessed |

## 5. Strengths Identified by the Lecturer

Record only strengths explicitly mentioned or confirmed by the lecturer.

1. **Strength 1:** To be completed after review.
2. **Strength 2:** To be completed after review.
3. **Strength 3:** To be completed after review.

## 6. Concerns or Weaknesses Identified by the Lecturer

Record the lecturer's actual concerns. Link each concern to a requirement, feature, design decision, or project deliverable where possible.

1. **Concern 1:** To be completed after review.
2. **Concern 2:** To be completed after review.
3. **Concern 3:** To be completed after review.

# 7. Suggested Improvements and Team Response

Use the table below to turn feedback into trackable work. Suggested solutions should be agreed by the team and should not be presented as lecturer recommendations unless the lecturer stated them.

| ID | Lecturer Comment / Recommendation | Team Response / Proposed Action | Priority | Owner | Target Date | Status | Evidence / GitHub Issue |
|---|---|---|---|---|---|---|---|
| FE-01 | **To be completed after review** | To be agreed by the team | High / Medium / Low | To be assigned | To be assigned | Open | To be added |
| FE-02 | **To be completed after review** | To be agreed by the team | High / Medium / Low | To be assigned | To be assigned | Open | To be added |
| FE-03 | **To be completed after review** | To be agreed by the team | High / Medium / Low | To be assigned | To be assigned | Open | To be added |
| FE-04 | **To be completed after review** | To be agreed by the team | High / Medium / Low | To be assigned | To be assigned | Open | To be added |

### Recommended process for handling feedback

1. Record the comment accurately and identify the source/date.
2. Clarify any ambiguous requirement with the lecturer before changing scope.
3. Estimate the effect on implementation, schedule, testing, and documentation.
4. Assign an owner and create a GitHub Issue for agreed actions.
5. Update the relevant proposal, requirements, design, plan, or KPI document.
6. Verify completion and attach evidence before marking the action as closed.

## 8. Scope and Feasibility Review

The proposed feature set is broad for the available DEPI schedule. After lecturer review, the team should confirm which features are mandatory for the initial release and which may be deferred.

| Scope Item | Lecturer Decision / Notes | Team Action |
|---|---|---|
| Personal workspace and core task management | Pending | Confirm priority |
| Kanban board and task lifecycle | Pending | Confirm acceptance criteria |
| Timer and time-entry reports | Pending | Confirm timer rules and required reports |
| Client Portal and Project Live Room | Pending | Confirm required client-visible functions |
| Deliverable review and change requests | Pending | Confirm approval workflow scope |
| Gantt chart and task dependencies | Pending | Confirm minimum required Gantt functionality |
| Work handover and project-health alerts | Pending | Confirm priority or defer if necessary |
| Advanced automation, extensive analytics, and platform billing | Pending | Treat as optional unless explicitly required |

## 9. Evaluation Outcomes and Follow-up

| Item | Details |
|---|---|
| Overall Lecturer Decision | Pending lecturer assessment |
| Changes Required Before Approval | Pending lecturer feedback |
| Accepted Scope / MVP | Pending team and lecturer confirmation |
| Follow-up Review Date | To be agreed |
| Evidence that feedback was addressed | GitHub Issues / Pull Requests / updated documents / test results |

## 10. Review History

| Version | Date | Change | Updated By |
|---|---|---|---|
| 1.0 | 14 Oct 2026 | Initial feedback and evaluation template created | TaskFlow team |
| 1.1 | To be completed | Lecturer feedback and agreed responses recorded | To be completed |

## 11. Approval

| Reviewer | Name | Decision / Date |
|---|---|---|
| Lecturer / DEPI Reviewer | To be completed | Pending |
| Team Lead | Mostafa Mohamed Mahmoud Mohamed | Pending team review |
| Team Representative | To be completed | Pending |

**Completion note:** Replace the pending fields with the lecturer's actual feedback after the review. Do not submit placeholder text as though it were a completed lecturer assessment.
